Full-stack engineer with 1+ year of commercial experience building cloud-based Python applications, distributed systems, and AI/GenAI-integrated solutions.

EXPERIENCE

ResilienceSoft

Feb. 2025 – Present

Junior Software Developer

- Developed and maintained **cloud-based Python (FastAPI)** services; diagnosed and resolved **N+1 query** bottlenecks, reducing API response times from **10+ seconds to under 1 second**.
- Built an **SSE-based real-time logging and metrics system** using **Redis** and async Python workers, streaming live application events to a monitoring dashboard — replacing polling with low-latency event-driven architecture.
- Designed **FHIR-compliant backend schemas** for a healthcare platform using **PostgreSQL**, enabling interoperable storage and querying of patient records across distributed services.
- Integrated **WhatsApp Business API** and **Meta API** into a CRM platform with **role-based access control** and real-time chat inbox, enabling client-facing communication workflows.
- Integrated **AI agents and MCP servers** into development workflows to automate PR summaries and test scaffolding — cutting average feature turnaround by ~2 days per sprint (**GenAI solution**).
- Led a **legacy Express backend migration** — modernized database schemas and upgraded to the latest Node.js runtime; implemented **CI/CD pipelines** via GitHub Actions.

PROJECTS

Reposage – AI Workflow Analyzer | *FastAPI, Next.js, Redis, BullMQ, PostgreSQL, Azure* | [GitHub](#) Jan 2026 – Mar 2026

- Built an **event-driven GenAI pipeline** on **Azure Container Apps** ingesting GitHub webhook events; LLM-based analysis detects large commits, dependency bloat, and architectural drift with results on a real-time dashboard.
- Serverless API processes webhook payloads in **under 100ms**; distributed workers with **PostgreSQL + Prisma** enable historical trend tracking — deployed via **Docker** containers on Azure.

Repeto.dev – Automated LeetCode Notification Platform | *Hono, Supabase, Cloudflare Workers* | [repeto.dev](#) Mar 2026

- Engineered a serverless notification service supporting **200+ users**, using **Cloudflare Workers** and scheduled crons to deliver daily LeetCode POTD emails at user-customized times.

Folio – Offline PWA | *Svelte 5, SvelteKit, PDF.js, IndexedDB* | [folioapp.pages.dev](#)

2026

- Built a **fully offline Progressive Web App** with **<100ms interaction latency** and **<150kb gzipped** bundle; implemented **SM-2 spaced-repetition** algorithm with all state persisted locally — no backend required.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript

Backend Frameworks: FastAPI, Django, Node.js, NestJS, Express, Hono, REST APIs, WebSockets, SSE, Celery

Cloud & DevOps: Azure (Container Apps), AWS (EC2, Dynamo DB), Docker, Kubernetes, Cloudflare Workers, GitHub Actions CI/CD

Databases: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM

Frontend: React.js, Next.js, React Native, SvelteKit

Architecture: Event-driven systems, Distributed systems, Async job queues (BullMQ), GenAI / RAG pipelines, MCP servers

EDUCATION

Chhattisgarh Swami Vivekananda Technical University

B.Tech in Computer Science Engineering | **CGPA: 8.1/10**

Bhilai, Chhattisgarh

Nov. 2021 – July 2025
